## Performance Series Bourdon Operated Pressure Switch

Models: 231, 232, 233 \& 234

## Key Features

- Precision stainless steel mechanism for arduous atmospheres and high humidity.
- Set point adjustable over the whole range against calibrated scale with tamperproof adjuster.
- Weatherproof and Flameproof models ATEX and IECEx.
- Safety vented design as standard.
- NACE MR-01-75 compatibility.
- Hermetically sealed microswitch option.
- Models for fixed switching differential, adjustable differential and HI-LO operation.
- Ranges available up to 600 bar (8,500 psi). Static Pressure up to 690 bar (10,000 psi).

## Series Overview

- Designed in the mid-1970s and developed over subsequent years, the Performance Series switch range offers users the broadest range of options, the highest levels of set-point repeatability and the confidence of long term performance that a mature product such as this can prove.
- The model 231/232/233/234 Performance Series pressure switches utilise bourdon tube type sensor that offer a very linear response to pressure change. This sensor, coupled with a precision stainless steel mechanism designed to minimise friction in the moving parts, helps deliver the market leading performance customers have come to expect from the series.

## Product applications

The 230 Performance Series is suitable for a wide range of applications in:

- Oil \& Gas
- Chemical
- Petrochemical
- Refining
- Power
- Food Industry

The choice of models available ensures that the $\mathbf{2 3 0}$ Performance Series is suitable for use in:

- Corrosive atmospheres
- Resistant to chemical attack

How can we help you?
Delta Mobrey offers fast, efficient and knowledgeable support when and where you need it. Please visit our web site at www.delta-mobrey.com to find your local support centre or call us on:
+44 (0) 1252729140

## How to order

Switches can be configured by selecting codes representing the desired features from the tables that follow. The chart below, describes how the model code is built up. For assistance in configuring a switch that best suits your needs, please contact your local sales office.

NOTE: Options shaded in the following tables are the most common options and are available on the quickest lead-times and at the lowest cost.

NOTE: Only the most common options are shown in this data sheet. Should you require a feature that is not shown, please contact your local sales office for further details.

Special build is also available for temperatures down to -60 % (-76 %)
```

## Enclosure

## FINISH

All enclosures except Type A are finished in light grey epoxy resin paint. Special finishes to order.

## INTRINSIC SAFETY

Because of the low voltages and currency of I.S. circuits, we recommend using gold and/or sealed contacts.

Temperatures in Table 1 refer to limitations for certified enclosures.

See TECHNICAL SPECIFICATION

## Models

## TABLE 2

|  | Code |
| :--- | :---: |
| Fixed Switching Differential <br> See Tables 10A \& 10D. <br> Basic model giving close, fixed switching differential using <br> proprietary microswitch operated by high integrity stainless steel <br> mechanism. Set point field adjustable over full range against <br> calibrated scale. SPDT \& DPDT options available. | 231 |
| Adjustable Switching Differential (Limited Span) <br> See Tables 10B \& 10E. |  |
| Achieved by special microswitch with built in adjuster, SPDT only. <br> Not available with enclosure code N or O. | 232 |
| Adjustable Switching Differential (Wide Span) <br> See Tables 10B \& 10E. <br> Separate control of set and reset points with individual setting points <br> on calibrated scale. | 233 |
| HI-LO Switching (Adjustable Gap) <br> See Tables 10C \& 10F. <br> Two individual set points and separate electrical circuits, with <br> independent adjustment against calibrated scale. | 234 |

## Electrical Entry

Adaptors are available for other popular thread sizes.

## Enclosures 'W' and ' N '

Standard option code $1(22 \mathrm{~mm}$ dia) is provided with a nylon $22 / 20$ reducer and fibre washer suitable for a standard M20 cable gland and back nut. Option code 0 elbow adaptor is factory fitted. Adaptor kits may also be provided retrospectively to fit at site if required. Ask for details. See diagrams for dimensions.

## 'W' and 'N' SAFETY NOTE

If a metal cable gland is site fitted it must either be earthed locally or an earth/gland plate must be used to connect the body of the gland at the enclosure earthing point. Earth/gland plates can be provided either factory fitted or in kit form for site assembly. Ask for details.

Material of Wetted Parts

Not all ranges are available with all materials. Refer to Table 5 for availability.

TABLE 3

|  | Code |
| :--- | :---: |
| Enclosures W \& N: Clearance for 20mm (3/4 in) outside dia conduit. | 1 |
| Enclosures H, K, A \& O: M20 x 1.5 ISO thread (direct) | 0 |
| Enclosures H \& K: M20 x 1.5 ISO thread, dual entry. | 5 |
| Enclosures H \& K: 3/4-NPT INT. | 3 |
| Enclosures H \& K: 3/4-NPT INT dual entry. | 6 |
| Enclosure W: M20 x 1.5 elbow adaptor. | 0 |
| Enclosure N: M20 x 1.5 straight adaptor (Approved). | 0 |
| Enclosures H \& K: 1/2-NPT INT. | 2 |

TABLE 4

|  | Code |
| :--- | :---: |
| Bourdon tube and process connection of 316 stainless steel welded <br> fabrication . | 2 |
| Nickel alloy (Monel) bourdon tube and connection*. <br> For wetted parts required to conform with Sour Gas and Sour Crude <br> applications as laid down in NACE standard MR-01-75*. | M |

## Setting Ranges

$P_{\max }=$ maximum working pressure
NOTE: Range codes shown are for bar/psi units only. Code will differ for other units.

For ranges and models requiring Monel wetted parts not shown in Table 5, ask for details.

| Range |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | 231 |  | 232 |  |  |  |
| 233 |  |  |  |  |  |  |  |

A much wider variety of switching options can be engineered to customers' special requirements for models 231 and 234 pressure switches, including heavy DC, manual latching, pneumatic output etc. On models 232 and 233, only the switching options specified can be supplied. Please consult our engineers for further information.

## Process Connection

Other thread specifications and sizes are available without using adaptors.

See DIMENSIONS.
Adaptors are available for applications where their use is permitted.

## Options \& Treatments

Combinations available, apply for details.

## Special Engineering

 used when special engineering is required.

|  | Code |
| :--- | :---: |
| Rc $1 / 4$ (1/4 BSP tr INT) to ISO 7/1 | A |
| $1 / 4-18$ NPT INTERNAL | F |
| $1 / 2-14$ NPT INTERNAL | H |
| $1 / 2-14$ NPT EXTERNAL | J |

## Electrical Connections

## Terminal Block

Cable entry is to a non-pinching terminal block made of a non-hygroscopic thermosetting plastic, suitable for cables up to $2.5 \mathrm{~mm}^{2} / 14 \mathrm{AWG}$.

Earthing/Grounding
An earthing stud is provided inside all weatherproof enclosures, adjacent to the entry.External earthing is standard on flameproof versions. Safety note see Table 3.

## Dielectric Strength

The electrical assembly is capable of withstanding *2kV between live parts and earth/ground and 500 V between open contacts.

* 1.2kV for micro switch Codes H2, H3, H4 and H6. Refer to Table 6.

## Electrical Entry

Standard options are listed in Table 3. Other threads can be accommodated by adaptors. Dual entry available, see Table 3.

## Optional Extras

## Chemical Seals

Chemical seals of our own or proprietary manufacture can be fitted when required.

## Mounting Position/Location/Installation

Vertical as shown, IN DIMENSIONS, taking care to avoid siting in locations that transmit excessive shock or vibration. For further advice contact our engineers.

Pollution degree (EN60947-5-1)
All products are suitable for use in pollution degree 3. For extreme conditions where condensation may readily form, then sealed contacts should be used. See Table 6 Codes 08/09/28, 0G/0H/2G, H2/H3/H4/H6.

Electrical Isolation
These products are not suitable for electrical isolation. Always isolate circuit separately to carry out any electrical work.

## Approvals

## EUROPEAN DIRECTIVES

Low voltage Directive (LVD) 2014/35/EU.
Compliant to LVD
Pressure Equipment Directive (PED) 97/23/EC:
This product has a process connection size <=DN25 and is therefore categorised as sound engineering practice under Cat 3.3

## ATEX APPROVALS

FLAMEPROOF:
Certificate No. BAS01ATEX2426X
