# Bourdon Tube Pressure Gauges 

## Bayonet ring case stainless steel With limit switch contact assembly

This data sheet contains information on the maximum possible number of contacts, on electrical connections, ordering information and options concerning the models RCh and RChOe with limit switch contact assemblies (with low-action, magnetic, electronic or inductive contacts), as well as dimensional drawings with the position of the electrical connections.

Data sheet 1201 contains all details concerning the available versions of models RCh and RChG without limit switches. These details as well as the required ordering information apply also to the version with limit switches, unless otherwise stated below. Instead of glycerin, a special oil is used for liquid-filled pressure gauges with limit switches. The model code for instruments with case filling is RChOe.

Model overview $\mathbf{9 . 1 0 0 0}$ contains general and detailed definitions, applications and operating principles for the respective limit switch types. It also provides detailed information on the selection, switching functions and minimum spans, on operating conditions, explosion protection, options and others.

## Standard Versions

Available Limit Switch Contact Assemblies

1. Direct (electromechanical)

| 1.1 Low-action contact | S |
| :--- | :--- |
| 1.2 Magnetic contact | M |
| 2. Indirect (contact-free) |  |
| 2.1 Electronic contact | E |
| 2.2 Inductive contact | I |
| 2.3 Pneumatic contact | P upon request |

Maximum Possible Number of Contacts

|  | NCS 100 case filling |  | NCS 160 case filling |  |
| :---: | :---: | :---: | :---: | :---: |
|  | without | with | without | with |
| $\begin{aligned} & \text { up to } 3 \times S \\ & 4 \times S^{1)} \end{aligned}$ | upon request | - | $\begin{aligned} & 0 \\ & 0 \end{aligned}$ | - |
| $\begin{aligned} & \text { up to } 3 \times M^{1} \\ & 4 \times M^{1)} \end{aligned}$ | upon request | $0$ | $\begin{aligned} & 0 \\ & 0 \end{aligned}$ | $\begin{aligned} & 0 \\ & 0 \end{aligned}$ |
| $\begin{array}{r} \text { up to } 3 \times E \\ 4 \times E \end{array}$ | upon request | upon request | upon request | upon request |
| $\begin{array}{r} \text { up to } 3 \times 1 \\ 4 \times 1 \end{array}$ | O upon request | O upon request | upon request | upon request |
| = available |  |  |  |  |

Degree of Protection (DIN EN 60529 / IEC 60529)
IP54
IP65 for model RChOe (span $\geq 2.5$ bar)

## Blow-out Device

Model RCh blow-out plug in the back of the case, $1^{\prime \prime}(\varnothing 25 \mathrm{~mm})$ Model RChOe blow-out device at the top of the case coverage

## Case Ventilation

Model RChOe via blow-out device

## Nominal Case Sizes

100, 160 mm (4, 6")

## Window

Polycarbonate fortype - 1
Laminated safety glass for types - 3 and - 6

Adjusting Mechanism Limit Setting Pointer
All instruments are equipped with an adjusting lock in the window. With the removable key, the limit setting pointer can be externally set to the value of the desired switch point.

## Electrical Connection

- for limit switch (S/M) only model RCh 100-1
- for limit switch (E)
- for limit switch (I)
plug connector PA6, black screwed cable gland $\mathrm{M} 12 \times 1.5$ terminal box PA6, black terminal box PA6, blue for identification of an intrinsically safe circuit, anything else as E

Plug Connector and Terminal Box
6 -pin + PE, screwed cable gland M 20x1.5 with strain relief, IP65 according to VDE 0110 insulation group C/250, terminals numbered according to wiring diagram (on the device)

For the position of the electrical connection, please refer to the dimensional drawings, see pages 2 and 4 (cable entry).

Case Configurations, Code Letters, Dimensional Data and Weight
Compared to the basic models, there are deviations in the front-to-back sizes, see table.
Please refer to data sheet 1201 for the other dimensional data.

code letters Fr
without case filling
code letters Fr
with case filling

Blow-out Device
Blow-out device for model RChOe
pressure range $\leq 1.6$ bar blow-out device no. 5
$\geq 2.5$ bar blow-out device no. 3
 when mounting plug connector, terminal box or PP / PE converter to the back of the case, for NCS 100 a blow-out plug in the back of the case is not possible.

with front flange for panel mounting
letters rFr
with case filling

with u-clamp for panel mounting
code letters rBFr without case filling

Example

## Information on Limit Switches with 3 and 4 Contacts

In contrast to pressure gauges with 2 contacts, pressure gauges with 3 or 4 contacts do not always allow the limit setting pointers to be adjusted one above the other.

| Behaviour of the limit setting pointers to each other |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Type limit switch | 3 limit setting pointers |  | 4 limit setting pointers |  |
|  | NCS 100 | NCS 160 | NCS 100 | NCS 160 |
| S, M | adjustable one above the other |  | only 3 pointers adjustable one above the other |  |
| E, I | only 2 pointers | above the other | only the two m pointers adjustab above the oth | only 3 pointers adjustable one above the other |

## Switching functions

Those limit setting pointers with 3 and 4 contacts, which are not adjustable one above the other, are separated by point when indicating the switching function.
Example: M $222.1 \quad$ 4-fold; $3^{\text {rd }}$ and $4^{\text {th }}$ limit setting pointer not adjustable one above the other
E 1.22.1 $\quad 4$-fold; only the two middle pointers adjustable one above the other

| Minimum distance of the limit setting pointers, which are not adjustable one above the other (in degree) |  |  |
| :--- | :---: | :---: |
| Type <br> limit switch | NCS 100 | NCS 160 |
| S, M | 15 | 10 |
| E, I | 35 | 28 |

## Electrical Connection

## Cable entry

- For instruments without case filling
- IP65
- Cable entry M $12 \times 1.5$ with strain relief and 1 m connection cable (connection cable longer than 1 m upon request)
- Available for types S/M

Dimensional Data (mm / inch) and Weight (kg / lb)

## Plug connector DIN EN 175301-803

- IP65, 3-pin + PE and protective contact
- Available for max. $2 \times S / M$ or $1 \times E / I$
or $2 \times \mathrm{E}$ for option PNP switching output as 2-wire connection
The plug connectors DIN EN 175301-803 have the same position of connection as the plug connectors and terminal boxes, see page 2.

## Construction type A

for instruments without case filling

Construction type C

for instruments without and with case filling

## Circular plug connector

- For instruments without and with case filling
- IP67, 4-pin
- Available for max. $2 \times \mathrm{E} / \mathrm{I}$
- With 2 m die cast cable upon request

The circular plug connectors have roughly the same position of connection as the cable entries, see above.

Angular cable box
